

SHOT 1: PRESTON'S DESK

PRESTON HUNTER sits at his desk. WE SEE a complex database table on his computer screen.

Preston swivels around in his chair, speaks to camera.

PRESTON  
Hello. My name is Preston Hunter  
and I'm a database designer.

Preston SPRAYS his keyboard with can of keyboard cleaner (the one with the straw on the end).

PRESTON (CONT'D)  
Organization is my focus in  
database design. This is my  
philosophy in everything I do.

SHOT 2: WE SEE above the desk is a sign "AN ORGANIZED HOME IS A HAPPY HOME".

PRESTON (VOICE OVER) (CONT'D)  
Why am I passionate about database  
design? One word: data.

SHOT 3: SON'S BEDROOM DOOR

Preston knocks on his son's door. WE HEAR "yeah?" from the room.

PRESTON (CONT'D)  
Is your room clean, son?

SHOT 4: INSIDE SON'S BEDROOM

Tidy. However, we're about to see exactly HOW TIDY...

PRESTON (VOICE OVER) (CONT'D)  
Data is at the heart of everything  
I do. In database design, as in  
life, one must respect and elevate  
the data, to make it more useful.

SHOT 5: CLOSET

Clothes are organized by COLOR (bright red shirts next to green or yellow shirts to highlight contrast).

PRESTON (VOICE OVER) (CONT'D)  
I work in the background, finding  
the best way to organize your data.

SHOT 6: BOOKSHELF

Books are organized by PAGE COUNT. The thinner books are on the left, gradually getting thicker and thicker based on pages. Preston notices an incongruous book, seems out of place. He points at the misplaced book, and looks at his SON.

PRESTON (CONT'D)

You must respect the data, son. Is the page count 221 or 365?

SON

(guilty)  
365 pages.

His son SWITCHES the two books. Preston nods, proud.

PRESTON

Doesn't that feel better?

SHOT 7: BATHROOM

The family TOOTHBRUSHES are lined up by HEIGHT.

PRESTON (VOICE OVER) (CONT'D)

Organization insures data is properly maintained, integrity is solid, and daily performance is exceedingly fast.

SHOT 8: REFRIGERATOR

Organized by FOOD GROUPS. BREADS, FRUITS, VEGETABLES, DAIRY... all products are properly LABELED.

PRESTON (VOICE OVER) (CONT'D)

MySQL, MariaDB, Oracle, Microsoft SQL Server: I know my way around most any database environment.

SHOT 9: DINNER TABLE

WE SEE the meal - mashed potatoes, carrots, steak are all separated, no food is touching.

PRESTON (VOICE OVER) (CONT'D)

I keep things working smoothly behind the scenes, so front-end users only see professionalism.

SHOT 10: PRESTON IS ABOUT TO TAKE A BITE

PRESTON (CONT'D)

I help clients who need a database design from scratch, or clients who need a professional to review or re-design an existing database so that it is faster and easier to use. I look forward to working with you.

Preston takes a bite. Speaks to his wife, off screen.

PRESTON (CONT'D)

Delicious. Well organized meal, honey.
